

# Product packaging

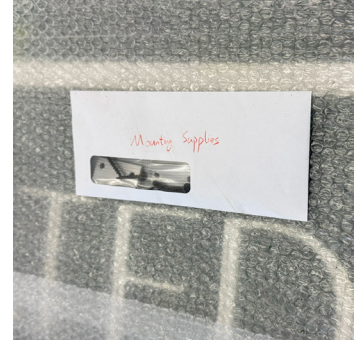

**1.** Prepare soft and hard packaging materials for you:

**2.** Use bubble wrap for preliminary packaging:

**3.** Individually package installation components:

**4.** Enhance packaging rigidity and protect corners:

**5.** Perform secondary hard packaging protection:

**6.** Perform secondary soft packaging protection:

**7.** Reinforce and seal the packaging, and record packaging information:

By following these seven steps, your product will receive adequate protection and stability during transportation. We will adjust and supplement the steps based on the specific characteristics and requirements of your product to ensure that each step meets your packaging needs, while also complying with relevant transportation and packaging regulations and standards.
