# About Us

Wildleaf was born from a simple realization: while people spend over 90% of their time indoors, most interior environments lack the calming, restorative power of greenery. As landscape architects working across high-end projects in Boston, our founders, Tina and Shoka, saw this disconnect firsthand—and set out to change it.

During the pandemic, this became even clearer: nature isn't a luxury—it's essential. However, traditional indoor plants or living walls require costly, time-consuming maintenance. That's why we committed ourselves to a better solution: preserved interior landscaping that delivers the benefits of nature without the upkeep.

At Wildleaf, we combine design with commercial performance. Our preserved moss walls and greenery systems are engineered to meet the needs of modern interiors, with certifications to back them:

- **ASTM E84 Class A Fire-Rated**
- **ASTM C423 NRC 1.01 Acoustic Rating**
- **ASTM E2149 Antimicrobial Protection**

To ensure flawless aesthetics, we pioneered the industry's first seamless modular moss system, featuring our proprietary wavy-cut edge—a detail developed to eliminate the visual seams often seen in traditional moss walls. It's this dedication to refinement and performance that sets us apart.

Our preserved materials are sustainably harvested and treated with plant-based glycerin and food-grade dyes, maintaining their color and softness for up to 8–10 years without water or sunlight. Compared to traditional plantings or green walls, our systems are maintenance-free and cost-effective—cutting lifecycle costs by up to 70%, while supporting up to 15 LEED credits in categories such as Low-Emitting Materials, Acoustic Performance, and Biophilic Design.

Today, we partner with architects, designers, developers, and property managers to deliver beautiful, high-performance greenery systems across offices, healthcare, retail, hospitality, educational facilities, senior living, and more.

# Materials & Production

— Why Choose Acoustic Greenery Solutions

**Natural Materials**

**100% Zero Maintenance**

**Antimicrobial and Pest-Resistant**

**Fire Safety Certification**

**Superior Acoustic Performance**

**Non-toxic & Safe**

**5-Year Warranty**

## Moss Wall Overview

Wildleaf offers two preserved moss wall systems—FlexMoss and SeamlessMoss—engineered for effortless maintenance, acoustic performance, and modular architectural integration.

**FlexMoss**

Flexible, trim-to-fit reindeer moss wall tiles with over 30 color options—ideal for curves, branding and surface adaptability.

**SeamlessMoss**

Precision wave-cut moss wall system engineered for seamless installation, architectural scalability and acoustic performance.
